

# The future of food from the sea in the World (Marine Capture Vs Aquaculture)

While **China** is by far the major fish producer with more than 80,000,000 of tons in 2018, **Iceland** has the largest seafood consumption in the World in terms of kg/per capita. The top 5 countries (others are **Maldives, Kiribati, Hong Kong, and Malaysia**) account for 11.89% of it.
